Meryl Breidbart
At One Ventures

Dear Meryl and At One Ventures Hiring Team,

I am excited to apply for the Analyst role at At One Ventures. As a deep tech enthusiast and climate advocate, I strongly believe in the firm's mission to back early-stage deep tech entrepreneurs who are working towards making humanity a net positive to nature.

In the past three years, I have gained valuable experience in venture capital through my work as an intern at a private equity/venture capital fund management firm and Masters in Economics coursework at the University of Texas at Austin. I have taken multiple courses in modeling and forecasting, including data mining and machine learning, time-series econometrics, and causal inference.

I am passionate about making a positive impact on the planet, and I see the intersection of deep tech and climate as a key area where I can make a difference. I have a deep interest in new technologies such as AI, robotics, and biotech and how they can be applied to solve climate challenges.

In addition to my technical skills, I am highly organized and methodical in my approach to work. I can work independently and prioritize tasks to meet tight deadlines while maintaining a high level of accuracy. I have also demonstrated a strong sense of accountability, taking ownership of projects and seeing them through to completion.

I am excited about the opportunity to conduct investment thesis research and support deal making at At One Ventures. I am eager to work with a team that shares my values and is committed to making a positive impact on the planet. I am confident that my skills and experiences make me a strong fit for this role.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Reilly Blakeslee
